Running a FORCED UPDATE
These Are the Instructions for Both Vista and XP Users Running a FORCED UPDATE

1) For VISTA AND XP .. Please Make Sure that you are logged into the computer as the COMPUTER ADMINISTRATOR.
2) Download the Version of the FORCED UPDATE from our website for your Triton GPS Model.
3) Extract zip file and you will see two files .. one is instructions and the other is the new firmware.
4) Now connect GPS using USB cable to computer.
5) **Make sure that you have good batteries in the GPS.**
6) Make sure that VantagePoint and any National Geographic programs are NOT RUNNING.
7) After connecting GPS turn the GPS on. The unit will establish a connection. Watch the unit on boot up as you have to highlight "Connect to PC" choice and enter.
8) For VISTA .. Now on your computer highlight the new firmware program and right click and do a compatibility and click on <u>RUN AS ADMINISTRATOR</u>.
9) Run this program and it should see the GPS and after agreeing to license run the program.
10)   The Program will take about 30 minutes to run. The program will say FINISHED but wait until the GPS automatically turns off.
11)   Now exit the firmware program and disconnect the GPS from the computer.
12)   Disconnect the cable and start the GPS.

All should be well ...
